NOVA LUCE

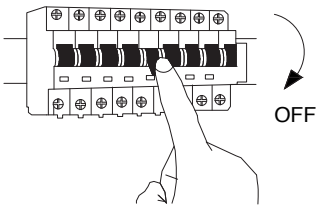

9953198

1

Turn on the general switch

2

Observe its movement from a distance

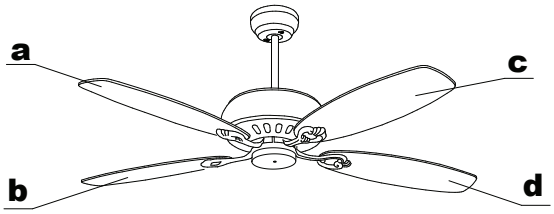

3

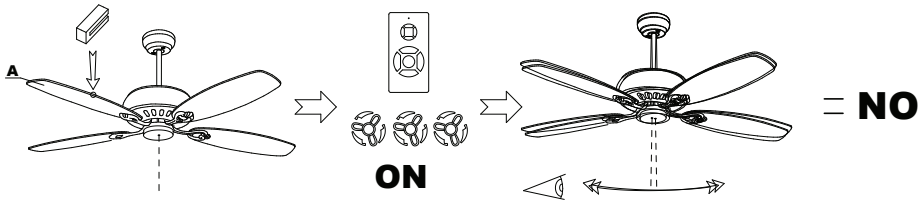

If it appears to be unstable,it should be balanced accordingly using the equilibrium.

NOVA LUCE

9953198

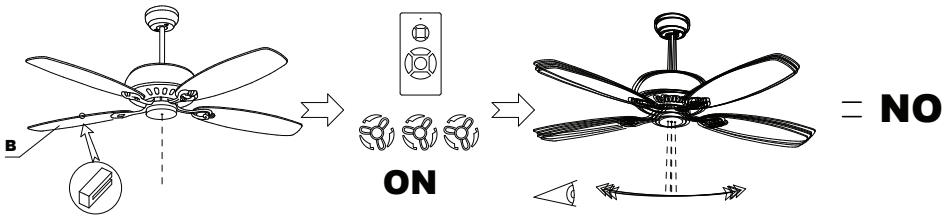

4

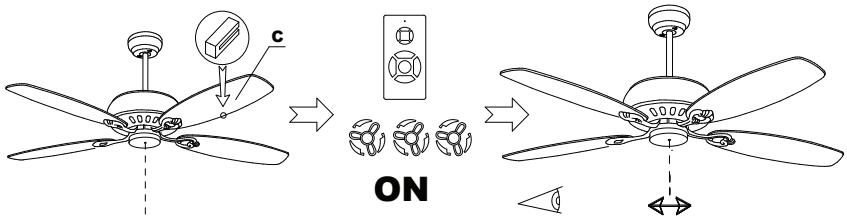

Place the equilibrium on the center of the A Wing and turn on the fan in medium volume.
Observe from a safe distance & if it appears non stable,it should be balanced.

5

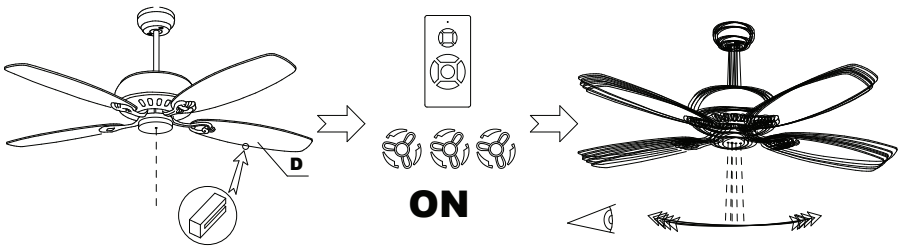

Repeat the process with B wing. If it appears non stable,it should be balanced.

6

Repeat the process with C wing. If it appears non stable,it should be balanced.

7

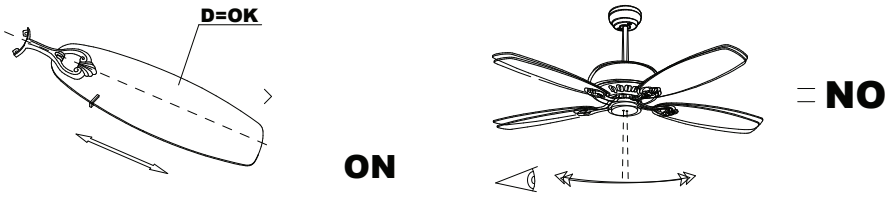

Repeat the process with D wing. If it appears non stable,it should be balanced.

NOVA LUCE

9953198

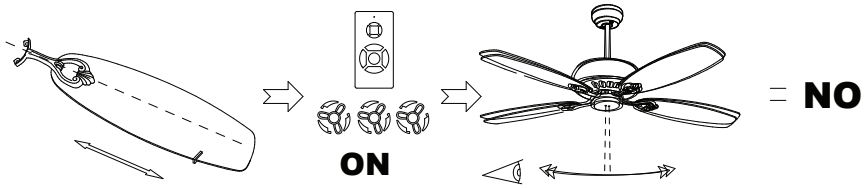

a

When D wing appears to be stable,make sure to place the equilibrium on the right place.

---

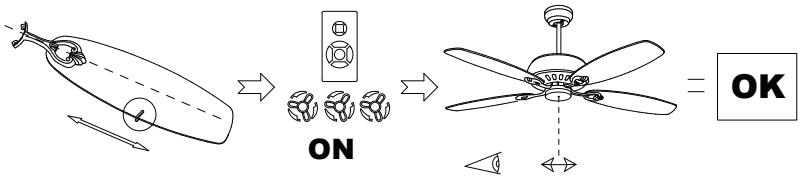

b

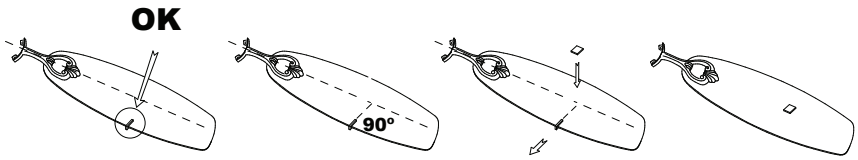

If the equilibrium is near the edge,when you turn on the fan,it will appear unstable.

---

c

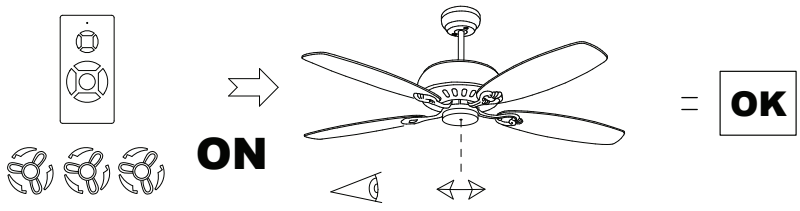

When the equilibrium is in the middle of the wing,when you turn on the fan,it should be stable.

---

d

Turn on the fan & if it appears stable on the center, Your installation is ready for use.
